

SplashBotix EtherNET Control Cabinet

Standard controls specially engineered for the pool, play deck and show fountain industry

Designed with Designers in Mind

SplashBotix standardized controls are specially engineered with show fountain and water feature designers in mind.

Our comprehensive standard controls platform eliminates the need for patchwork, often temperamental, controls systems, ensuring long-lasting, smooth operations.

The EtherNET Control Cabinet provides an industrial solution for connecting EtherNET devices and other SplashBotix control cabinets together, either when distances are too great or when additional ethernet ports are needed for a given application.

The cabinet is an industrial solution for all EtherNET-based networks and is suitable for stand-alone operations where industrial-hardened EtherNET network infrastructure is needed.

Benefits

- High quality brushed 100% 316 stainless steel construction
- NEMA 4X
- Industrial EtherNET Hub
- Lockable main disconnect
- Pad-lockable

Specifications

Part No	071010D001
Dimensions	30 x 30 x 8
Incoming Power	110 VAC
Full Load Current	5 AMP
Max number EtherNET ports	24
Weight	45lbs
