

# SplashBotix Main Control Panel (MCP)

Standard controls specially engineered for the pool, play deck and show fountain industry

## Designed with Designers in Mind

SplashBotix standardized controls are specially engineered with show fountain, swimming pool, spa and most other water feature designers in mind.

Our comprehensive standard controls platform eliminates the need for patchwork, often temperamental, controls systems, ensuring long-lasting, smooth operations.

The SplashBotix Main Control Panel features a 10" Touch Screen (HMI) user interface enabling maximum configurability for your unique water feature. The control panel also features a brushed 316 stainless steel construction with a quarter-turn pad-lockable latch.

Each MCP can control up to eight pumps in total, including four separate basins (e.g. water features) and four filtration pumps. A network of MCPs can be configured to control any number of applications across a park or installation's entire operations.

### Benefits

- Highly configurable via pad-lockable HMI user interface
- Remote connectivity for both operations and support
- Standardized for reliable, smooth operations
- High quality 100% 316 stainless steel construction

### Specifications

Part No.	071017C001
Weight	100 lbs
Dimensions (H x W x D)	36" x 30" x 12"
Enclosure Material	Brushed 316 Stainless Steel
Enclosure Rating	NEMA Type 4X
Latch	Quarter-Turn (Pad-Lockable)
Agency Listings & Approvals	UL 508A
Supply Voltage	110 VAC
Supply Current	3 A
Internal Control Voltage	24 VDC
Operational Environment	Indoors
Nominal Operating Temperature	0°C to 40°C
Remote Connection*	User interface accessible via all major internet browsers on MacOS, Windows, iOS, and Android
Firewall	Netgate 1100
Interface	10" Touch Screen HMI, Lockable
