

SplashBotix Primary Led:BUS Lighting Control Cabinet

Standard controls specially engineered for the pool, play deck and show fountain industry

Designed with Designers in Mind

SplashBotix standardized controls are specially engineered with show fountain and water feature designers in mind.

Our comprehensive standard controls platform eliminates the need for patchwork, often temperamental, controls systems, ensuring long-lasting, smooth operations.

Featuring a brushed 316 stainless steel construction with a quarter-turn pad-lockable latch, the SplashBotix Primary Led:BUS Lighting Control Cabinet is specially designed to control Fontana lighting products using the proprietary communication protocol Led:BUS.

It comes standard with four pre-written shows, contains its own show controller and can also be controlled remotely using DMX. Its pad-lockable DMX slider is conveniently located on the front of the cabinet, and allows users to implement static scenes of any color.

The Primary Led:BUS Cabinet is also equipped with a sophisticated insulation monitor that can detect dangerous and damaging leakage current that may otherwise go undetected by a standard GFCI, bringing a whole new level of protection to your equipment.

About Led:BUS

Beloved by pool and fountain lighting specialists for its lack of complexity, the Led:BUS communication protocol owes its elegant simplicity to its straightforward three-wire design.

Specifications

Part No	069062F001
Weight	140 kg / 300 lb
Dimensions	945 mm x 474 mm x 1443 mm 37.19" L x 18.66" W x 56.81" H 316 Stainless Steel
Max Wattage	3840 W
Incoming Power	120 VAC
Full Load Current	42.1 FLA
Max Led:BUS Address	42 RGB / RGBW or 168 White

Benefits

- Standardized for reliable, smooth operations
- High quality 100% 316 stainless steel construction
- Specially designed to work with Fontana Led:BUS protocol
- Integrates seamlessly with SplashBotix MCP
- Safety features bring added protection against potential leakage current
